ONONDAGA LAKE NATURAL RESOURCE DAMAGE ASSESSMENT RESTORATION PROJECTS

New York State Department of Environmental Conservation
United States Fish and Wildlife Service, Department of the Interior

Southwest Lakeshore Trails

Southwest Shore Angler Access Project Highlights

- Improved fishing access along 1.4 miles of shoreline between Onondaga Lake Visitors Center and Harbor Brook, directly accessible from Southwest Shore Recreation Trail
- Access gives anglers exposure to deep, moderate and shallow water depths
- New 10,000-square-foot gravel parking area to be created

Deep Water Fishing Pier Project Highlights

- Floating fishing pier installed to give anglers deep water access along southwestern shore
- Connection from fishing pier to Southwest Shoreline Recreation Trail
- Annual installation of pier in early spring and removal late fall

Visitors Center Transfer Project Highlights

- Maintenance of Onondaga Lake Visitors Center for five years
- Picnic area added to lawn area north and east of Visitors Center
- Potable water connection installed from County's West Side Pump Station to Visitor's Center
- Cold water rinse station to assist in invasive species control efforts
