

National Environmental Policy Act (NEPA). This project involves the proposal to implement a comprehensive habitat restoration plan with a public access component for an approximately 400-acre area known as the San Dieguito Lagoon. The project site is in the western San Dieguito River Valley under the influence of the Pacific Ocean, within the northwestern-most portions of the City of San Diego and the City of Del Mar in San Diego County, CA.

A major component of this planning effort is a tidal restoration proposal to: (1) Restore the aquatic functions of the lagoon through permanent inlet maintenance and expansion of the lagoon's tidal prism; and (2) create subtidal and intertidal habitats on both the east and west sides of Interstate 5, which bisects the project site. It is anticipated that tidal restoration would be accomplished primarily by Southern California Edison and partners (SCE), provided the restoration satisfies the conditions of the California Coastal Commission (CCC) permit for the construction and operation of the San Onofre Nuclear Generating Station (SONGS) Units 2 and 3. Upland habitat restoration, non-tidal wetland restoration, endangered species habitat improvements, and public trails and interpretive facilities would be provided by the San Dieguito River Park in cooperation with other agencies and organizations including the Fish and Wildlife Service, Coastal Conservancy, Cities of Del Mar and San Diego, and others.

The Final EIS/R analyzes six project alternatives including the Mixed Habitat, Maximum Tidal Basin, Maximum Intertidal, Hybrid, Reduced Berm, and No Action Alternatives. The lead agencies indicate a preference for the Mixed Habitat alternative. The project includes measures to mitigate some potential impacts, while other mitigation will be made conditions of subsequent permits.
