Is Pacific low salt marsh is no longer a state imperiled habitat? I seem to only have received the tail end of the conversation. I am working on those impacts currently.

Ok, I see what you are saying about the State Imperiled Habitat list. Looks like it was changed in 2008? I tried to skim it to see if/how designation of the salicornia marsh has changed, but can't find that info quickly. If you have a moment after digitizing the 1987 eelgrass layer, would you please try to sort that out? Maybe call someone in the Priority Habitats division?

Otherwise, we might want to remove that from the map.

Ok here all PDF copies of the maps so far. The next step would be deciding on standard symbology, looking for errors, adding/removing layers. The maps were made with FWS

Standards templates.
