OK. Then I would suggest the photos get put in a new/create folder in the S:\Dungeness\Aquaculture file. Please add maybe a word doc. with the location and/or name of the GIS files in AGOL.

Thanks,

Lorenz

Do you want pictures of oyster bags and other debris that we find embedded in the ground or otherwise tangled?

If so where should they be housed permanently? I also have a few gps points of the debris.

Thanks,  
Julie
