Thanks for the quick reply, Rebecca. These options will certainly work!

It should be somewhere on the USFWS network for staff to use. I don't know if all USFWS staff have access, but I'm sure you can request access if not.

Subject: WA Wetlands of High Conservation Concern at Dungeness NWR

Hi, Rebecca and Jasa.

I am working on a map for Dungeness National Wildlife Refuge and need to add the WA Wetlands of High Conservation Concern shown in your web viewer. We are only interested in the polygons intersecting the Refuge (screen shot below). I was unable to find a download option on the viewer, nor the data available on the Heritage Program nor WADNR data sites. Can you point me to where I can retrieve them? Alternately, if available as a service in AGOL I may be able to work with that.

Thank you.
