You did not provide an S: drive location for these files (you had originally attached them to an email). I do not see them in the Aquaculture file with the rest of the response information (just the one I saved), so I'm not sure where the final docs are located. I tried search on the S: but came up empty. Please save the final version of the Word and ppt docs in S:\Dungeness\Aquaculture\Jamestown Oyster Lease\Jamestown Aquaculture Docs & Attachments\Jamestown Shoreline Permit Application 2018\Biol Data for JST.

Thanks,
Jennifer

Hey Jennifer,

Here is the paragraph we talked about. I think I have all the points in it we thought were important. If you see anything that needs changing please feel free. I've read it through a few times but is first cut. The photos are large so I put them in a ppt. and put cations with each explaining something about it. If you want to go over this let me know.
