We'll take care of it. I just got off the phone with ACE and Ryan McReynolds in the Lacey ES office and we are hoping to all meet with the Tribe in mid-late April. Sounds like ACE is holding strong on USFWS taking the Fed lead. It will be interesting to hear what Frank has to report.

Ryan McReynolds has agreed to take a cursory look at the methods that have been provided to see if there are any obvious "red flags". ACE has a draft Biological Assessment for aquaculture that should be available for release this summer. It could really be useful for our assessment of proposed actions.

Jennifer, thank you for all your efforts on this challenging request from the tribe. We believe it was a productive meeting yesterday and just wanted to reassure you that we are all in this together.

Could you pls document our meeting in the tribal database for our records.

Many thanks, Kevin and Sylvia
