Importance: High

hey Sue,

So here's where we were at (not very far) - I drafted the statement of work for us (attached) updated with information about where to get the WADNR data. Also attached a single zipped version of the map packages you sent me in case needed to re-start with. Let us know if you need anything else.

Liz,

For when we are back in the office on Jan 31. We have a short-turnaround high-priority map request (see below). I talked with Sue and got the best available data. Also attached a statement of work. Lets talk, then again with Sue on Thursday Jan 3 when she is back in the office. Hope you can help.

Would someone be available to help out WA Maritime with maps for a RD briefing on Jan 8th? I know how seemingly small projects end up being much

more than that.

The Jamestown Tribe has applied for Army Corps and County permits to operate an oyster aquaculture farm within the boundaries of Dungeness NWR. We have a briefing with Robin on January 8, and may need a little GIS assistance to create a couple of professional maps of the site. Do any of your GIS whizzes have any extra moments that could be stolen for this purpose? Sorry for the late notice, we are responding to a very short deadline.

Thanks,
Jennifer
