---

Dear Commissioner Franz and Director Thorson,

As it is known that the oyster project at Dungeness Spit will endanger birds and other wildlife in the refuge, please stop this from happening. Please withdraw the oyster project permits immediately. It is the responsibility of all of us to do what we can to protect our natural world. Plastics are a serious threat to us all and need to be strictly controlled. This is especially relevant for wildlife in a sensitive area. This is not an insignificant issue. Lost wildlife may never recover. Please do your part to prevent this from happening.

Sincerely,

Debra Burt
