Dear Director Morrison.,

The proposed oyster operation at Dungeness National Wildlife Refuge will impact natural habitat and wildlife, was insufficiently reviewed for those impacts, and if it goes forward, needs more adequate monitoring and regulatory supervision. Your office needs to be a central part of this, and take a strong and transparent role in protecting refuge natural resources. As USFWS Regional Director you are obliged to be part of the solution to better limiting impacts on the refuge, not part of thr problem.

Steven Yanoff
