

of the comment that includes information claimed as CBI, a non-CBI copy of the comment that *does not* contain the information claimed as CBI must be submitted for inclusion in the public docket. Information marked accordingly will not be disclosed except in accordance with procedures shown in 40 CFR part 2 of the Code of Federal Regulations.

When submitting a nomination, EPA prefers the nominator include a name, affiliation, phone number, mailing address, and email address; however, this information is not required, and nominations can be submitted anonymously. The nominator should also address the following questions for each nominated contaminant:

1. What is the nominated contaminant's name, CAS Registry Number (CAS RN) or DSSTox substance identifier (DTXSID), and/or common synonym (if applicable)? Note—please do not nominate a contaminant already subject to the National Primary Drinking Water Regulations (NPDWRs) (see the current list at <https://www.epa.gov/ground-water-and-drinking-water/national-primary-drinking-water-regulations>).

2. What are the data you believe support the conclusion that the nominated contaminant is known or anticipated to occur in public water systems? For example, provide information that shows measured occurrence of the contaminant in drinking water, measured occurrence in sources of drinking water that provide water to public drinking water systems, measured occurrence in other water types (*i.e.*, ambient water (rivers, lakes, or streams) groundwater, wastewater, stormwater, or urban runoff) or provide information that shows the contaminant is released in the environment or is manufactured in large quantities and has the potential for contaminating sources of public drinking water. Please provide the source of the information with complete citations for published information (*i.e.*, author(s), title, journal, and date) and/or contact information for the primary investigator. Additionally, please provide original supporting or supplemental information files relevant to the published information (*i.e.*, data tables, data sets, or data files, etc).

3. What new health effects data are available which you believe supports the conclusion that a contaminant may have an adverse effect on the health of humans? For example, provide information that shows the contaminant may have an adverse health effect on the general population or that the contaminant is potentially harmful to subgroups that comprise a meaningful

portion of the population (such as children, pregnant women, the elderly, individuals with a history of serious illness, individuals living in disadvantaged communities with known occurrence of emerging contaminants in their public water systems, or others). Please provide the source of this information with complete citations for published information (*i.e.*, author(s), title, journal, and date) and/or contact information for the primary investigator. Additionally, please provide original supporting or supplemental information files relevant to the published information (*i.e.*, data tables, data sets, or data files, etc).

B. How do I submit nominations in hard copy?

You may submit contaminant nominations by mail or hand delivery. To allow full consideration, please ensure that your nominations are received or postmarked by midnight on April 18, 2023. The address for submittal of nominations by mail or hand delivery is listed in the **ADDRESSES** section of this notice.

C. What will happen to my nominations after I submit them?

EPA will evaluate the information available for all publicly nominated drinking water contaminants to determine the appropriateness of their inclusion on the CCL 6. EPA does not intend to respond to the nomination comments directly or individually. EPA will summarize the nominations received when the Draft CCL 6 document is published in the **Federal Register**.
