

Approved Surveyors in Virginia for Karst Geology

This list contains the names of individuals who are qualified to conduct karst geology assessments for projects in Virginia. If you select an individual not on this list, provide that individual's qualifications to this office for review and approval 60 days prior to an assessment. If a habitat assessment determines that any karst features are present, contact this office to allow us the opportunity to work with you to avoid or minimize adverse effects to rare species and their habitats during project design and implementation. Email correspondence and any habitat assessment results to virginiafieldoffice@fws.gov. Inclusion of names on this list does not indicate if they hold state or federal permits or constitute endorsement by the U.S. Fish and Wildlife Service or any other U.S. Government agency.
